

FINANCIAL TEAR SHEET

BUSINESS PROFILE

Inversiones Aguas Metropolitanas, IAM, holds 50.1% of the share capital of Aguas Andinas and subsidiaries, the largest sanitation group in Chile and one of the largest private companies in the sector in Latin America.

IAM's sanitation subsidiaries provide the services of catchment of raw water, the production, transportation and distribution of water, and the collection, treatment and final disposal of sewage, to a universe of approximately 8 million people in the Metropolitan, De Los Lagos and De Los Ríos Regions.

Its concession areas in Chile's central valley cover 70 thousand hectares, and 67 thousand hectares in the provinces of Valdivia, Ranco, Llanquihue, Chiloé and Palena in the south of the country.

IAM's sanitation subsidiaries Aguas Andinas, Aguas Cordillera, Aguas Manquehue and ESSAL provide high levels of coverage, similar to those of developed nations: 100% in water supply, 98% in sewage and 100% in sewage treatment.

The non-sanitation subsidiaries EcoRiles, Gestión y Servicios, Anam and Aguas del Maipo provide an integral management in the sanitation industry through services related to the treatment of industrial waste, the sale of equipment, laboratory analysis and the development of energy projects relating to sanitation companies, respectively.
