Note 1. GENERAL INFORMATION

Inversiones Aguas Metropolitanas S.A. (hereinafter "IAM" or the "Company") and its subsidiaries make up the Inversiones Aguas Metropolitanas S.A. Group (hereinafter the "Group"). (Hereinafter the "Group"). Its legal address is Apoquindo N°4800, Torre 2, office 2001, 20th floor, Las Condes, Santiago, Chile and its Taxpayer Identification Number is 77.274.820-5.

IAM was incorporated on May 19, 1999, by the companies Aguas de Barcelona S.A. ("AGBAR") and Suez Environment as a limited liability company, in order to participate in the privatization process of Empresa Metropolitana de Obras Sanitarias ("EMOS"), currently Aguas Andinas S.A.

IAM was awarded the shareholding package in the international bidding carried out by the Corporación de Fomento de la Producción (CORFO), subscribed a capital increase and purchased additional shares in the Stock Exchange, thus controlling 51.2% of the capital stock of Aguas Andinas S.A. (formerly EMOS).

In July 2005, the Company became an open stock corporation and restricted its corporate purpose, which was limited to the investment in shares of Aguas Andinas S.A. and the provision of all kinds of advisory, consulting and services related to technology transfer and know-how, technical assistance, business and project management, especially those related to the management and operation of businesses related to the sanitation business.

In November 2005, IAM was floated on the stock exchange, through the placement of a package of shares corresponding to 43.4% of its ownership, which resulted in the incorporation of new shareholders.

During 2006, IAM sold 1.1% of its shares in Aguas Andinas S.A., retaining 50.1% of its shares, which allowed it to maintain control of the sanitary company.

In 2007, it implemented an ADR Level I program, which made it possible to trade its shares in the over-the-counter market in the United States, this program was terminated in 2016.

The Company is the parent company of three sanitary companies in Greater Santiago (Aguas Andinas S.A., Aguas Cordillera S.A. and Aguas Manquehue S.A.). In order to provide a comprehensive service within its line of business, the Company has non-sanitary subsidiaries, providing services such as liquid industrial waste treatment (EcoRiles S.A.), laboratory analysis (Análisis Ambientales S.A.), marketing of materials and other services related to the sanitary sector (Gestión y Servicios S.A.) and activities associated with water use rights and energy projects derived from facilities and assets of sanitary companies (Aguas del Maipo S.A.).

The Company and its subsidiary Aguas Andinas S.A. are registered in the Securities Register of the Financial Market Commission under No. 912 and No. 346, respectively. The subsidiaries Aguas Cordillera S.A. and Aguas Manquehue S.A. are registered in the Special Registry of Reporting Entities of the Financial Market Commission under No. 170 and No. 2, respectively. As sanitary sector companies, they are regulated by the Superintendence of Sanitary Services, in accordance with Law No. 18,902 of 1989 and Decrees with Force of Law No. 382 and No. 70, both of 1988.

For the purpose of preparing the consolidated financial statements, a group is understood to exist when the parent company has one or more subsidiaries over which the parent company has direct or indirect control. The accounting policies applied in the preparation of the Group's consolidated financial statements are detailed in Note 2.2.

The direct controlling entity is Veolia Inversiones Aguas del Gran Santiago Ltda. ("VIAGSA") with a 50.1% ownership interest, which is controlled by Veolia Inversiones Andina S.A. and is controlled by Agbar S.L.U., an entity based in Spain and one of the largest sanitary services operators in the world, which in turn is controlled by Veolia Environment (France).

Note 2. BASIS OF PREPARATION AND ACCOUNTING POLICIES

2.1 Basis of preparation

These consolidated financial statements correspond to the Consolidated Statements of Financial Position as of June 30, 2023 and December 31, 2022 and the consolidated statements of comprehensive income, changes in net equity and cash flows for the periods ended as of June 30, 2023 and 2022, which have been prepared in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (hereinafter "IASB"), and represent the full, explicit and unreserved adoption of the aforementioned IFRS.

The Group complies with the legal conditions of the environment in which it operates, particularly the sanitation subsidiaries regarding the regulations of the sanitation sector. The Companies of the Group display normal operating conditions in each area in which they carry out their activities, their forecasts show a profitable operation, and they have the capacity to access the financial system to finance their operations, which in the opinion of the management determines their capacity to continue as a functioning company, as established by the accounting standards under which these consolidated financial statements are issued.

Functional and presentation currency

The financial statements of each of the companies comprising the Group are stated in the currency of the primary economic environment in which such companies operate (functional currency). For purposes of the consolidated financial statements, the results and financial position of each Group Company are expressed in Chilean pesos (rounded in thousands of pesos), which is the functional currency of the Company and its Subsidiaries, and the presentation currency for the consolidated financial statements.

New accounting pronouncements

The standards and interpretations, as well as improvements and amendments to IFRS that have been issued, effective as of the date of these financial statements, are detailed below. The Company has applied these standards and concluded that they did not significantly affect the financial statements.

	Standards and Amendments	Date of mandatory application
IFRS 17	Insurance Contracts	January 1, 2023
IAS 8	Definition of accounting estimates	January 1, 2023
IAS 1	Disclosure of accounting policies	January 1, 2023
IAS 12	Deferred taxes related to assets and liabilities arising from single transactions	January 1, 2023
IAS 12	International Tax Reform - Second Pillar Model Rules	January 1, 2023

The standards and interpretations, as well as improvements and amendments to IFRS that have been issued but are not yet in force at the date of these financial statements are detailed below. The Company has not applied these standards early.

	Amendments	Date of mandatory application
IAS 1	Classification of liabilities as current or non-current	January 1, 2024
IFRS 16	Lease liabilities related to leaseback sales	January 1, 2024
IAS 7 and IFRS 7	Disclosures about vendor financing arrangements	January 1, 2024
IFRS 10 and IAS 28	Consolidated Financial Statements - sale or contribution of assets between an investor and its associate or joint venture	To be determined

The Management of the Company considers that the adoption of the Standards, Amendments and Interpretations described above, which may apply to Inversiones Aguas Metropolitanas S.A. and Subsidiaries, are in the process of evaluation and it is estimated that, at the date of their first application, they would not have a significant impact on the consolidated financial statements of the Group in the period of their first application. Management is periodically evaluating these implications.

Responsibility for the information and estimates made.

The information contained in these consolidated financial statements is the responsibility of the Board of Directors of the Company, which states that all the principles and criteria included in the International Financial Reporting Standards (IFRS) have been applied. The Board of Directors, at its meeting held on Aug 23, 2023, approved these consolidated financial statements.

In the preparation of the consolidated financial statements estimates have been used, such as:

- Revaluation of land
- Useful life of property, plant and equipment and intangibles
- Valuation of assets and goodwill purchased (goodwill or goodwill on investments)
- Impairment losses on assets
- Assumptions used in the actuarial computation of employee termination benefits
- Assumptions used in the fair value calculation of financial instruments
- Revenue from supplies pending invoicing
- Provisions for commitments with third parties
- Risks arising from current litigation

Although these estimates and judgments were made based on the best information available at the date of issuance of these consolidated financial statements, it is possible that events that may occur in the future, may make it necessary to modify them (upward or downward) in future periods, which would be recorded prospectively, at the time the variation is known, recognizing the effects of such changes in the corresponding future consolidated financial statements.

2.2 Accounting policies

The main accounting policies adopted in the preparation of these consolidated financial statements are as follows.

A. Basis of consolidation

The consolidated financial statements include the financial statements of the Company and the entities controlled by the Company (its Subsidiaries). Subsidiaries are those entities over which the Group has the power to direct the relevant activities, is entitled to variable returns from its involvement and has the ability to use that power to influence the amounts of the investor's returns. Subsidiaries are consolidated from the date on which control is transferred to the Group and are excluded from consolidation on the date on which control ceases.

In the consolidation process, all transactions, balances, gains and losses between Group entities are eliminated.

The Company and its subsidiaries have uniformity in the policies used by the Group.

The subsidiaries included in the consolidated financial statements of Inversiones Aguas Metropolitanas S.A. are as follows:

Tax ID	Company name	Country of origin	Funcional Currency	Direct %	Indirect %	Total 06-30-2023 %	Direct %	Indirect %	Total 06-30-2023 %
61.808.000-5	Aguas Andinas S.A.	Chile	CLP	50.1023%	0.0000%	50.1023%	50.1023%	0.0000%	50.1023%
96.809.310-K	Aguas Cordillera S.A.	Chile	CLP	9999.0030%	-	9999.0030%	9999.0030%	-	9999.0030%

B. Operating segments

IFRS 8 establishes standards for reporting on operating segments and disclosures related to products and services. Operating segments are defined as components of an entity for which there is separate financial information, which is regularly reviewed by the management to make decisions about resources to be allocated to the segments and to evaluate their performance.

The Group manages and measures the performance of its operations by business segment. The operating segments reported internally are as follows:

- Operations related to the sanitation business (Water).
- Operations not related to the sanitation business (Non-Water).

C. Intangible assets other than goodwill

The Company recognizes an identifiable intangible asset when it can demonstrate that it is probable that the future economic benefits attributed to the asset will flow to the entity and the cost can be measured reliably.

i. Intangible assets acquired separately:

Intangible assets acquired separately are stated at cost less accumulated amortization and accumulated impairment losses. Amortization is calculated on a straight-line basis using estimated useful lives. The estimated useful lives and amortization method are reviewed at the end of each reporting period and the effect of any change in estimate is accounted for prospectively.

ii. Amortization method for intangible assets:

Intangible assets with definite useful life

The amortization method applied by the Company reflects the pattern in which the future economic benefits of the asset are expected to be used by the entity. For this purpose, the Company uses the straight-line method of amortization.

Computer software

The estimated useful life for software is 4 years. For other assets with a defined useful life, the useful life over which they are amortized corresponds to the periods defined in the contracts or rights that give rise to them.

Intangible assets of indefinite useful life

Intangible assets with indefinite useful lives correspond mainly to water rights and easements, which were obtained on an indefinite basis, as established in the acquisition contracts and the rights obtained from the General Water Directorate of the Ministry of Public Works.

Determination of useful life

Factors to be considered in estimating useful life include, but are not limited to, the following:

- Legal, regulatory or contractual limitations.
- Predictable life of the business or industry.
- Economic factors (product obsolescence, changes in demand).
- Expected reactions from current or potential competitors.
- Natural factors, climate and technological changes that affect the ability to generate profits.

The useful life may require modifications over time due to changes in estimates as a result of changes in assumptions about the above factors.

D. Goodwill

Goodwill generated in the business combination represents the excess of the cost of acquisition over the interest of the Group in the fair value of the assets and liabilities, including the identifiable contingent liabilities of a Subsidiary Company at the date of acquisition.

The valuation of the assets and liabilities acquired is made provisionally on the date on which control of the Company is acquired and is reviewed within a maximum period of one year from the date of acquisition. Until the fair value of the assets and liabilities is definitively determined, the excess between the acquisition price and the book value of the Company acquired is provisionally recorded as goodwill.

In the event that the final determination of goodwill is made in the financial statements of the year following the year of acquisition of the interest, the prior period's items presented for comparative purposes are modified to include the value of the assets and liabilities acquired and of the final goodwill from the date of acquisition of the interest.

Goodwill generated prior to the date of our transition to IFRS, i.e., January 1st, 2008, is maintained at the net value recorded at that date, while goodwill originated after that date remains recorded according to the acquisition method.

Goodwill is not amortized; instead, at the end of each accounting period, an impairment test is performed to determine whether the recoverable amount of goodwill has been reduced to an amount lower than the recorded net cost, and if so, the appropriate adjustment for impairment is made, as required by IAS 36.

E. Property, plant and equipment

The Company uses the cost method for the valuation of Property, Plant and Equipment, except for land, which is valued using the revaluation method. The historical cost includes expenses that are directly attributable to the acquisition of the asset.

Land revaluations are performed with sufficient regularity to ensure that the carrying value of the revalued asset does not differ significantly from fair value.

The revaluation surplus, net of the corresponding deferred taxes, is recognized in other comprehensive income within equity. However, in the event that a revaluation deficit of the same asset previously recognized as a loss is reversed, such increase is recognized in the statement of income. A decrease in value is recorded in the statement of income, except in the event that such decrease reverses the existing surplus on the same asset that would have been recognized in adjustments for changes in value.

Subsequent costs are included in the value of the initial asset or recognized as a separate asset only when it is probable that future economic benefits associated with the fixed asset items will flow to the Group and the cost of the item can be reliably determined. The value of the replaced component is derecognized for accounting purposes. All other repairs and maintenance are charged to income for the period in which they are incurred.

Depreciation method and estimated useful life for property, plant and equipment:

The depreciation method applied by the Company reflects the pattern in which the assets are expected to be used by the entity during the period in which they generate economic benefits. For this purpose, the Company uses the straight-line depreciation method over their technical useful lives, which is based on studies prepared by independent experts (external specialist companies). The residual value and useful lives of the assets are reviewed, and adjusted, if necessary, at each closing of the Statement of Financial Position.

When the value of an asset exceeds its estimated recoverable amount, its value is written down immediately to its recoverable amount (Note 32).

Useful lives

The useful lives considered for the purposes of calculating impairment are based on technical studies prepared by specialized external companies, which are reviewed as soon as information arises that allows considering that the useful life of an asset has been modified.

The allocation of the total useful life for assets is made on the basis of several factors, including the nature of the equipment. Such factors generally include:

1. Nature of the component materials of the equipment or constructions.
2. Operating environment of the equipment.
3. Intensity of use
4. Legal, regulatory or contractual limitations.

The useful life range (in years) by type of asset is as follows:

Item	Useful life (years) minimum	Useful life (years) maximum
Buildings	25	80
Plant and equipment	5	50
Information technology equipment	4	4
Fixed installations and accessories	5	80
Motor vehicles	7	10
Leasehold improvements	5	10
Other property, plant and equipment	5	80

Cost estimation policy for dismantling, removal or rehabilitation of property, plant and equipment:

Due to the nature of the assets being constructed in the Company and given that there are no contractual obligations or other constructive requirements such as those mentioned in IFRS and in the regulatory framework, the concept of decommissioning costs is not applicable at the date of these consolidated financial statements.

Property, plant and equipment sales policy

The results from the sale of property, plant and equipment are calculated by comparing the proceeds obtained with the book value and are recorded in the Consolidated Statement of Comprehensive Income.

F. Impairment of tangible and intangible assets except for goodwill

At each consolidated statement of financial position date, the Group reviews the carrying amounts of its tangible and intangible assets with definite useful lives to determine whether there are indicators that such assets have suffered an impairment loss. If such indicators exist, the recoverable amount of the assets is estimated to determine the amount of the impairment loss (if any). When it is not possible to estimate the recoverable amount of a particular asset, the Group estimates the recoverable amount of the Cash Generating Unit to which the asset belongs.

Intangible assets with indefinite useful lives are tested annually for impairment and when there are indicators that the asset may be impaired before the end of that period.

The recoverable amount is the higher between fair value minus costs to sell and value in use. In estimating value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects both the current market conditions of the time value of money and the specific risks associated with the asset.

When the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of that asset (or cash-generating unit) is adjusted to its recoverable amount by immediately recognizing an impairment loss in profit or loss. When an impairment loss is reversed, the carrying amount of the asset (or cash-generating unit) is adjusted to the revised estimate of its recoverable amount, provided that the adjusted carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior periods.

G. Leases

The Group evaluates its leases in accordance with IFRS 16, i.e., whether the right to control the use of an identified asset is transferred for a period of time in exchange for monetary consideration. Control is deemed to exist if the customer has: i) the right to obtain substantially all the economic benefits from the use of an identified asset; and ii) the right to direct the use of the asset.

When the Group acts as lessee, at the inception of the lease (i.e., on the date the underlying asset is available for use) it records a right-of-use asset and a lease liability in the statement of financial position.

The Group initially recognizes the right-of-use asset at cost, adjusted for any remeasurement of the lease liability, minus accumulated depreciation and accumulated impairment losses. The right-of-use asset is depreciated over the lease term. To determine whether the right-of-use asset is impaired, the same criteria detailed in Note 2.2F.

Lease liabilities are initially measured at the present value of the lease payments, discounted at the company's incremental borrowing rate, if the interest rate implicit in the lease cannot be readily determined.

After the commencement date, the lease liability is increased to reflect the accrual of interest and reduced by lease payments made. In addition, the carrying amount of the liability is remeasured if there is a change in the terms of the lease (changes in the term, in the amount of payments or in the evaluation of a purchase option or change in the amounts payable). Interest expense is recognized as a financial cost in the income statement for the period.

Short-term leases, equal to or less than one year, or leases of low-value assets are exempt from the application of the recognition criteria described above, recording the payments associated with the lease as an expense on a straight-line basis over the term of the lease.

When the Group acts as lessor, it classifies at the inception of the agreement whether the lease is an operating or finance lease, based on the substance of the transaction. Leases in which substantially all the risks and rewards incidental to ownership of the underlying asset are transferred are classified as finance leases. All other leases are classified as operating leases.

H. Financial assets

Acquisitions and disposals of financial instruments are recognized on the trade date, i.e., the date on which the Group undertakes to acquire or sell the asset. Investments are derecognized when the rights to receive cash flows from them have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Financial assets are classified in the following categories:

- Financial assets at fair value with changes in results
- Financial assets at fair value with changes in comprehensive income
- Financial assets at amortized cost

The classification depends on the nature and purpose of the financial assets and is determined at initial recognition.

The Company and its Subsidiaries invest in low-risk financial instruments that comply with the classification standards established in their investment policies. Thus, mutual investment funds must have an AAfm / M1 rating (shares with very high protection against loss associated with credit risks / shares with the lowest sensitivity to changes in economic conditions). Fixed-term deposits and covenants contracted are N-1 rated financial instruments (Instruments with the highest capacity to pay principal and interest on the agreed terms and maturities).

The issuing institutions of these financial instruments are banking companies or subsidiaries of banks with an N-1 risk rating and their instruments have a risk rating of at least AA (with a very high capacity to pay principal and interest on the agreed terms and maturities, which would not be significantly affected by possible changes in the issuer, the industry to which it belongs or in the economy).

i. Effective interest rate method

The effective interest rate method corresponds to the method of calculating the amortized cost of a financial asset or liability and the allocation of interest income or expense over the entire period concerned. The actual interest rate corresponds to the rate that exactly discounts the estimated future cash flows receivable over the expected life of the financial asset and makes the Net Present Value (NPV) equal to its nominal amount.

ii. Fair value with changes in other comprehensive income

For the classification of an asset at fair value through other comprehensive income, the sale of financial assets for which the principal amount plus interest, if any, is expected to be recovered within a specified period of time must be complied with as a principle.

iii. Financial assets at fair value with changes in income

Financial assets are presented at fair value through profit or loss when the financial asset is held for trading or is designated as at fair value with changes in profit or loss.

Financial assets at fair value with changes in profit or loss are valued at fair value and any resulting profit or loss is recognized in income. The net gain or loss recognized in income includes any dividend or interest received on the financial asset.

The Subsidiaries hold shares of Sociedad Eléctrica Puntilla S.A., which have been valued at fair value at the date of acquisition, as established in IFRS 9. They are subsequently measured at cost since there is no active market, according to the same standard.

iv. Financial assets at amortized cost

Loans and receivables

Trade, loans and other receivables are non-derivative financial assets which have fixed or determinable payments and are not quoted in an active market and are classified as loans and receivables. Loans and receivables are measured at amortized cost using the effective interest rate method, less any impairment losses, except for short-term receivables where the recognition of interest would be immaterial.

Commercial debtors and other accounts receivable

Commercial debtors correspond to the amounts billed for consumption of potable water, sewerage services, sewage treatment and other services and to the income accrued for consumption between the date of the last reading (according to the established monthly calendar) and the closing date of the Financial Statement. These are recorded at the net value of the allowance for doubtful accounts or those with a low probability of collection.

The trade debtor's policy is subject to the credit policy, which establishes the payment conditions, as well as the different scenarios to be agreed for delinquent customers.

Impairment policy for commercial debtors and other accounts receivable

The Company periodically evaluates impairment losses affecting its financial assets. The amount is recorded in the uncollectible provisions account. The carrying amount of the asset is reduced as the provision account is used and the loss is recognized in the consolidated statement of comprehensive income within "other expenses". When a receivable is uncollectible, it is recorded against the provision account for accounts receivable based on the expected credit loss model as established in IFRS 9.

Estimates are based on recovery statistics, which indicate that after the eighth month of unpaid invoices, the likelihood of recovery is marginal, in other words, the probability of recovering an invoiced amount is minimal.

In the subsidiaries Aguas Andinas S.A., Aguas Cordillera S.A. and Aguas Manquehue S.A., the debts of customers with more than 8 payments are provisioned at 100%.

In addition, the debts for consumption transformed into payment agreements are provisioned at 100% of the agreed balance.

Notes receivable with overdue debt are provisioned at 100%.

I. Inventories

Materials, spare parts and supplies are stated at acquisition cost, which does not exceed net realizable value. The costing method corresponds to the weighted average cost. Semi-annually, an impairment estimate is made for those materials that are damaged, partially or totally obsolete, or have not been in rotation for the last twelve months and their market price has fallen by more than 20%.

J. Dividend payment policy

The Company's dividend policy, as established in Article 79 of Law 18,046 governing corporations, is to distribute at least 30% of the net income of each period. In the event that these dividends do not exist or are less than the minimum established by law, the respective provision will be made.

In addition to this, and with the prior authorization of the Ordinary Shareholders' Meeting, the remaining 70% may be distributed as an additional dividend, provided that the current level of capitalization of the Company is maintained and that it is compatible with the investment policies of the Company.

K. Transactions in foreign currencies

Assets and liabilities denominated in foreign currencies are presented at the respective exchange rates valid at the end of each financial period, according to the following rates:

Currency	12-31-2022	31-12-2021
	\$	\$
US Dollar	801,66	855,86
Euro	874,79	915,95
JPY	5,56	6,52
AUD	534,16	583,01

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency gains and losses resulting from the settlement of these transactions and from the translation at closing exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of comprehensive income. The assets and liabilities arising from financial derivative contracts are excluded from the above. Differences in the fair value of these hedging contracts are charged to equity.

Exchange differences are recorded in the income statement for the period in which they accrue.

L. Financial liabilities

Loans, bonds with the public and similar obligations are initially recorded at fair value, net of transaction costs incurred. Subsequently, they are valued at amortized cost, using the actual interest rate, except for those transactions for which hedging contracts have been entered into, which are valued as follows.

M. Derivative financial instruments and hedge accounting

The use of derivative financial instruments by the Company and Subsidiaries is based on the Group's financial risk management policies, which establish the guidelines for their use.

Derivatives are recorded at fair value at the statement of financial position date. In the case of financial derivatives, if their value is positive, they are recorded under the caption "Other Financial Assets" and if it is negative, under the caption "Other Financial Liabilities".

Changes in fair value are recorded directly in income, unless a derivative has been designated for accounting purposes as a hedging instrument and all the conditions established by IFRS for the application of hedge accounting are met.

The treatment of hedging transactions with derivative instruments is as follows:

Fair value hedges. Changes in the market value of derivative financial instruments designated as hedging instruments, as well as the hedged items, are recorded with a charge or credit to the financial results of the respective income statement accounts.

Cash flow and net investment hedges in foreign currencies. Changes in the fair value of these derivative financial instruments are recorded for the actual portion directly in an equity reserve called "cash flow hedge", while the ineffective portion is recorded in income. The amount recognized in net equity is not transferred to the income statement until the results of the hedged transactions are recorded in the income statement, or until the maturity date of the hedged transactions.

In the event of discontinuation of the hedge, the accrued gain or loss at that date in net equity is maintained until the underlying hedged transaction is realized. At that time, the accrued gain or loss in equity will be reversed in the income statement affecting that transaction.

At the close of each period, financial instruments are stated at fair value. In the event of derivatives not traded in formal markets, the Group uses assumptions for their valuation based on market conditions at that date.

Effectiveness. A hedge is considered highly effective when changes in the fair value or cash flows of the underlying directly attributable to the hedged risk are offset by changes in the fair value or cash flows of the hedging instrument with an effectiveness in the range of 80% to 125%.

Embedded derivative. The Group also evaluates the existence of embedded derivatives in contracts and financial instruments to determine whether their characteristics and risks are closely related to the main contract, provided that the set is not being accounted for at fair value. If they are not closely related, they are recorded separately, with changes in value recognized directly in the consolidated income statement.

N. Provisions and contingent liabilities

Provisions are recognized when the Group has a present obligation as a result of past events, for which it is probable that the Group will use resources to settle the obligation and for which it can make a reasonable estimate of the amount of the obligation.

Provisions are quantified on the basis of the best information available on the event and its consequences and are re-estimated at each accounting closing. The provisions recorded are used to face the specific risks for which they were originally recognized, and are reviewed, in whole or in part, when such risks disappear or decrease.

Contingent liabilities are all those possible obligations arising from past events, whose future materialization and associated financial loss is estimated to be unlikely. In accordance with IFRS, the Group does not recognize any provision for these items, although, as required by the same standard, they are detailed in Note 18.

O. Employee benefits

The obligation for severance indemnities estimated to accrue to employees retiring from Aguas Andinas S.A., Aguas Cordillera S.A. and Aguas Manquehue S.A. are recorded at actuarial value, determined using the projected credit unit method. Actuarial gains and losses on severance indemnities arising from changes in estimates of turnover rates, mortality, salary increases or discount rates are determined in accordance with IAS 19 in other comprehensive income, directly affecting equity, which is subsequently reclassified to retained earnings.

Aguas Andinas S.A.

The severance indemnity for years of service at Aguas Andinas S.A. is governed by the provisions of the Labor Code, except for the amount of severance indemnity accrued as of July 31, 2002 and the payment for dismissal of 1.45 salaries, excluding voluntary resignation, without a cap on the amount or years, for employees who are part of the collective bargaining agreements in force and to whom, through their individual employment contract, the same benefit was extended. The amount accrued as of that date is adjusted quarterly according to the variation of the consumer price index. In addition, the aforementioned collective bargaining agreement establishes that employees who retire from Aguas Andinas S.A. and retire within 120 days from the date on which they reach the legal retirement age, may access the benefit detailed in the collective bargaining agreement, and continue to accrue this benefit after July 2002.

Aguas Cordillera S.A. and Aguas Manquehue S.A.

The severance indemnity for years of service at Aguas Cordillera S.A. and Aguas Manquehue S.A. is governed by the provisions of the Labor Code, except for the amount of severance indemnity accrued as of December 31, 2002 and the payment for dismissal of one salary without a cap on the amount or years, for employees who are part of the collective bargaining agreements in force and to whom, through their individual employment contract, the same benefit was extended. The amount accrued at that date is adjusted quarterly according to the variation of the consumer price index. Also, the aforementioned collective bargaining agreements establish that employees retiring from Aguas Cordillera S.A. and Aguas Manquehue S.A. continue to accrue this benefit after December 2002.

There are no benefits of this nature for the other subsidiaries.

P. Income tax and deferred taxes

Income tax expense corresponds to the sum of income tax payable and the change in deferred tax assets and liabilities.

Income tax payable is determined based on the taxable income for the period. The income tax payable of the Group is calculated using the tax rates that have been approved, or are in the last approval process, at the closing date of the statement of financial position.

Income tax payable is determined based on the taxable income for the period. The Group's income tax payable is calculated using the tax rates that have been approved, or are in the last approval process, at the closing date of the statement of financial position. Deferred taxes are recognized on the basis of the differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the calculation of taxable income and are accounted in accordance with the balance sheet liability method. Deferred tax liabilities are recognized for all taxable temporary differences, and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that future taxable profits will be available against which such differences can be utilized. Deferred tax assets or liabilities are not recognized if the temporary differences arise from the lower of the carrying amount or initial recognition (except in a business combination) of other assets and liabilities in a transaction that does not affect taxable profit or financial results.

The carrying amount of deferred tax assets is reviewed at each statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the recovery of all or part of the asset.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be in effect for the period in which the liability is settled or the asset realized, based on tax rates that have been enacted or substantively enacted by the end of the statement of financial position period. The measurement of deferred tax assets and liabilities reflects the tax consequences that would result from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amounts of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset tax assets against tax liabilities and they relate to the same entity and tax authority.

Q. Ordinary revenue

Ordinary revenue recognition policy

The Company determined its recognition and measurement of revenue from ordinary activities based on the principle that revenue is recognized at an amount that reflects the consideration to which the entity expects to be entitled in exchange for transferring goods or services to a customer. This fundamental principle should be applied on the basis of a five-step model:

- (1) Identification of the contract with the customer
- (2) Identification of the performance obligations of the contract
- (3) Determination of the transaction price
- (4) Allocation of the transaction price to the performance obligations
- (5) Recognition of revenue when (or as) the performance obligations are satisfied

Revenue recognition policy for sales of goods

Ordinary revenue from sales of goods is recognized once the significant risk and rewards of ownership of the goods have been transferred, the Company retains no relationship with the goods sold, the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the sale will flow to the Company and the costs incurred in the transaction are also reliably measurable.

Revenue recognition policy for sales of services

Revenue from the sale of services is measured at fair value. Billings are made on the basis of actual consumption or work performed of the consideration receivable, net of returns, trade discounts and rebates, so that revenue is recognized when it is transferred to the customer and recovery is considered probable, the associated costs and possible discounts for erroneous collections can be estimated reliably.

The service area of the sanitation companies is divided into billing groups, which determine dates for reading of the meters and subsequent billing. This process is developed based on a monthly calendar, which results in the existence of unread meters and therefore unbilled consumption at the end of each month.

For billing groups that have information on the basis of actually read consumption, the corresponding tariff will be applied.

In those cases, in which the Company does not have all the consumption read, the best estimate of that revenue pending billing will be made, that is, based on the physical data of the previous month valued at the current rate, considering in both cases (billing or estimate) the normal rate or overconsumption, as appropriate.

The transfer of risks and benefits varies according to the line of business of the company. For the sanitation services companies, the provision of services and all associated charges are made according to actual consumption and a monthly provision is made for consumption made and not billed based on previous billing. For the subsidiaries Análisis Ambientales S.A., EcoRiles S.A., Hidrogistica S.A. and Aguas del Maipo S.A., billing and any provision is made on the basis of work performed.

Method for determining service termination status.

The provision of sanitation services is verified through the measurement of consumption, in accordance with the provisions of the associated legal regulations, while for the non-sanitation Subsidiaries, once the services have been concluded and/or the respective reports have been issued.

Revenue from agreements with developers are recorded as ordinary revenue to the extent that certain conditions stipulated in each contract are met, which ensure that the associated economic benefit will flow to the Company.

R. Earnings per share

Basic earnings per share is calculated by dividing the profit (loss) attributable to equity holders of the Parent Company by the weighted average number of common shares outstanding.

The Group has not carried out any potentially dilutive transactions that result in earnings per diluted share other than basic earnings per share.

S. Environmental information

Assets of an environmental nature are considered to be those that are used on a lasting basis in the activity of the Subsidiaries, whose main purpose is to minimize adverse environmental impacts and protect and improve the environment, including the reduction or elimination of future pollution from the operations of the Subsidiaries.

These assets are valued at acquisition cost. The Subsidiaries amortize these items using the straight-line method, based on the years of estimated remaining useful life of the various items.

T. Consolidated statements of cash flows

The cash flow statement shows the cash movements during the period, which include the value added tax (VAT), determined by the direct method and with the following criteria:

Cash and cash equivalents: represent cash inflows and outflows and cash equivalents, which are short-term, highly liquid investments with low risk of changes in value (less than three months from the date of contracting and without restrictions).

Operation activities: represent activities typical of the normal operation of the business of the Company and its Subsidiaries, as well as other activities not classified as investing or financing activities.

Investment activities: represent activities of acquisition, sale or disposal by other means of long-term assets and other investments not included in cash and cash equivalents.

Financing activities: represent activities that produce changes in the amount and composition of net shareholders' equity and liabilities that are not part of ordinary activities.

U. Capitalized financing costs

Interest-bearing loan policy:

Borrowing costs that are directly attributable to the acquisition, construction or production of assets that meet the conditions for qualification are capitalized as part of the cost of such assets.

Interest cost capitalization policy:

Interest paid or accrued on debt financing qualifying assets is capitalized, as stipulated in IAS 23. The aforementioned IAS 23 establishes that when the Entity acquires debt for the purpose of financing investments, the interest on such debt must be deducted from financial expense and incorporated to the financed construction work, up to the total amount of such interest, applying the respective rate to the disbursements made at the date of presentation of the financial statements.

V. Non-current assets held for sale or to be distributed to owners.

The Company classifies as non-current assets (or group of assets for disposal) held for sale, property, plant and equipment, intangible assets, investments in associates, joint ventures and disposal groups (group of assets to be disposed of together with their directly associated liabilities), for which at the closing date of the financial position statement active efforts have been initiated for their sale, and it is estimated that it is highly probable that the transaction will be completed during the twelve-month period following such date.

Assets or groups subject to divestiture classified as held for sale are valued at the lower of their carrying amount or fair value less costs to sell and are no longer amortized from the moment they acquire this classification.

Non-current assets held for sale and components of disposal groups classified as held for sale or held for distribution to owners are presented in the consolidated financial statements as follows:

Assets in a single line item called "non-current assets or groups of assets for disposal classified as held for sale". Liabilities that are part of a group of assets for disposal classified as held for sale shall be presented in the statement of financial position separately from other liabilities, i.e., in the line item "Liabilities included in groups of assets for disposal classified as held for sale". These assets and liabilities shall not be offset, nor shall they be presented as a single amount.

In the statement of comprehensive income, a single amount comprising the total after-tax profit or loss from discontinued operations and the after-tax gain or loss recognized on measurement at fair value minus cost to sell, or on disposal of the assets or disposal groups constituting the discontinued operation, is presented under the caption "Gain (loss) from discontinued operations".

W. Reclassifications

For the period ended June 30, 2023, certain reclassifications have been made to facilitate comparison as of June 30, 2022, and December 31, 2022, respectively, as follows:

Reclassifications	Increase/ (Decrease) ThCh\$
Statement of comprehensive income by nature:	
Impairment gains and reversal of impairment losses (Impairment losses) determined in accordance with MFRS 9 on financial assets.	7,356,379
Other expenses, by nature	(7,356,379)
Statements of changes in equity:	
Retained earnings (losses)	2,709,364
Cash flow hedge reserve	(2,709,364)

Note 3. RISK MANAGEMENT

The main objectives of financial risk management are to ensure the availability of funds to meet financial commitments and to protect the value of the Group's cash flows, assets and liabilities.

This management is based on the identification of risks, the determination of the tolerance of each risk, the hedging of these financial risks and the control of the hedging operations established. To achieve the objectives, financial risk management is based on hedging all significant exposures, provided that suitable instruments are available, and the cost is reasonable.

i. Credit risk

Credit risk is the possibility of financial loss resulting from non-compliance by our counterparties (customers) with their obligations.

The sanitation subsidiaries have an atomized market, which means that the credit risk of a particular client is not significant.

The Company's objective is to maintain minimum levels of uncollectibility. There is a credit policy, which establishes the conditions and types of payment, as well as conditions to be agreed for delinquent customers. The management processes are control, estimate and evaluate uncollectibles in order to take corrective actions to achieve the proposed compliance. One of the main actions and measures to maintain low levels of uncollectible accounts is to interrupt the supply.

It should be noted that the sanitation Subsidiaries have voluntarily decided to suspend the interruption of service due to late payment of their bills during the period of the Catastrophe Status, in accordance with the Basic Services Law No. 21,249, effective until December 31, 2021.

On February 11, 2022, Basic Services Law No. 21,423 was published in the Official Gazette, which partially resolves the debt incurred during the pandemic by sanitation service customers who are in a more vulnerable situation and who have an average consumption that does not exceed 15 cubic meters of potable water per month. The debt and subsidy will be prorated in 48 monthly and successive installments. Each installment may not exceed 15% of the average monthly

consumption charge. The portion of the debt not covered by the subsidy will be extinguished, which will be recognized as a tax accepted expense.

The credit risk analysis method is based on the expected credit loss model, as established by IFRS 9. Estimates are based on recovery statistics, which indicate that after the eighth month of unpaid billings, the probability of recovering a billed amount is minimal. Consequently, as from the ninth month's billing, an impairment of the account receivable is immediately recognized, i.e., the delinquent customer is identified, and the amount of the provision is determined (it is not a percentage of the total portfolio). In addition, the debts for consumption transformed into agreements and the documents receivable with overdue debt are provisioned at 100%.

As of June 30, 2023, and December 31, 2022, the credit risk balances are ThCh\$48,518,912 and ThCh\$45,399,651, respectively (see Note 5).

ii. Liquidity risk

Liquidity risk is the possibility that the Group will have difficulty meeting its obligations associated with financial liabilities that are settled by delivering cash or other financial assets and will not be able to fund its commitments, such as long-term investments and working capital needs, at reasonable market prices.

Management monitors the Group's liquidity reserve forecasts based on expected cash flows.

A number of preventive measures are used to manage liquidity risk, such as:

- Diversify financing sources and instruments.
- Agree with creditors on maturity profiles that do not concentrate high amortizations in a single period.

Liquidity risk is monitored periodically in order to perceive, detect and correct deviations to mitigate possible impacts on income.

iii. Interest rate risk

The Company has a fee structure that combines fixed and variable rates as follows:

Debt instruments	Rate	%
Bank loans	Variable	9,40%
Bank loans	Fixed	10,51%
Bonuses	Fixed	64,34%
AFR	Fixed	14,55%
Derivative	Fixed	0,84%
Lease liability	Fixed	0,36%
Total		100.00%

Interest rate sensitization analysis

A rate analysis is performed with respect to the BAR (Banking Active Rate), assuming that all other variables remain constant. The method consists of measuring the positive or negative variation of the nominal BAR at the reporting date with respect to the average BAR of the last loan fixation.

The analysis is based on historical data with respect to the average daily market price of the 180-day BAR for the last 3 years as of the reporting date.

In accordance with the Group's policy, consumption debts transformed into payment agreements are fully provisioned. See Note 2.2. Letter H numeral iv. Impairment policy for trade debtors and other accounts receivable.

The main variation as of June 30, 2023, is presented in trade accounts receivable (decrease of ThCh\$2,480,603 compared to December 31, 2022).

During 2023, there is a decrease in commercial debts regarding December 2022, in the unmatured Commercial Debt 8 months or less for an amount of ThCh\$2,349,910. This is explained by the improvement in collection management and the seasonality of the sales cycle.

There are no customers with sales representing 10% or more of its consolidated ordinary revenues and no significant restrictions on accounts receivable requiring disclosure for the periods ended June 30, 2023, and December 31, 2022.

The movement in the allowance for doubtful accounts is as follows:

Movement credit risk accounts receivable	06-30-2023	12-31-2022
	ThCh\$	ThCh\$

Restrictions on ownership of property, plant and equipment

As of June 30, 2023, and December 31, 2022, property, plant and equipment are not subject to ownership restrictions, nor are they subject to performance bonds, as established in IAS 16, paragraph 74 (a).

Financial lease contracts

As of June 30, 2023, and December 31, 2022, leases under IFRS 16 (see Note 14) are recorded under "Assets by rights of use".

Impairment of assets

As of June 30, 2023, and December 31, 2022, the Company has not recognized in income of the period, impairment losses, reversals of impairment, as well as compensation from third parties, as established in points (v) and (vi) of paragraph 73 (e) and paragraph 74 (d) of IAS 16, since there are no indications of impairment in accordance with IAS 36.

Revaluation of land in Property, plant and equipment.

Land is initially recognized at acquisition cost and subsequently revalued using the revaluation method at fair value.

Appraisals of property, plant and equipment are made whenever there are significant variations in the variables that affect the determination of their fair values. Such frequent revaluations will be unnecessary for items of property, plant and equipment with insignificant variations in their fair value. For these, revaluations made every three or five years may be sufficient.

The fair value of land for property, plant and equipment was determined using the Market Comparison methodology, where a value is assigned to the land associated with the properties, based on a comparison with other properties of similar or comparable characteristics, according to objective criteria such as location, suitability, level of exposure, surface, morphology, topography, building conditions, as indicated in the respective Municipal Regulatory Plans in force, among others.

The sources used are transactions from the Real Estate Registry (Conservador de Bienes Raíces), where such information is available, and offers registered in the written media or real estate portals.

The appraisal of this land was carried out under the principle of highest and best use of land, in accordance with IAS 16, IFRS 13 and the requirements of the regulatory authority. The services of Transsa Consultores Inmobiliarios were hired, who are specialized independent appraisers with more than 35 years of experience throughout Chile and appraising all types of assets. In addition, financial advisory services were hired from Valtin Capital, who carried out an analysis of the real estate funds during the period from December 2019 to September 2020.

As indicated in Note 2.2.E, a decision has been made to change the accounting policy of IAS 16 from the cost method to the continuous revaluation method. The revaluation increase in assets has been as follows:

Reconciliation of the carrying value for revaluation of land	06-30-2023	31-12-2021

(*) The consolidated statements of income for the periods ended as of June 30, 2023 and 2022 include an expense of ThCh\$2,127,348 and ThCh\$512,976 respectively, which relates to short-term lease payments, which are exempt from the application of IFRS 16 (see Note 2.2 letter G).

Significant operating lease agreements

The most significant operating leases are related to the leasing of vehicles. In these cases, the contracts are for periods of less than 12 months. Leasing services are paid on a monthly basis upon presentation and approval of payment statements.

Termination of contract: The company may terminate the lease contracts in advance in case of serious breach of any of the conditions and obligations contained in the administrative rules and technical specifications, when this is the case, the company will be entitled to enforce the guarantee for the faithful, complete and timely performance of the contract, as compensation for damages.

14.4 Disclosures on operating leases as lessors

The Company has contracts of this type where it acts as lessor, which mainly refer to parts of operating enclosures, mostly with telecommunications companies, which have automatic renewal from 1 to 5 years, however, the Company has the power to give notice of termination between 30, 60, 90 and 180 days depending on the contract.

16.4 Disclosures on financial liabilities

Other financial liabilities

Other financial liabilities include bank loans, obligations with the public (bonds) and Refundable Financial Contributions (RFC), which for accounting purposes are valued at amortized cost, which are hereinafter explained:

Reimbursable Financial Contributions (RFC)

According to the provisions of Article 42-A of D.S. MINECON No. 453 of 1989, "Reimbursable Financial Contributions for extension and capacity are a financing alternative available to the provider (company providing sanitation services) for the execution of the sanitation extension and capacity works that, according to the Law, are its responsibility and cost".

They consist of determined amounts of money or works that the providers of public sanitation services may demand from those who request to be admitted as customers, or request an expansion of service, which, in accordance with the regulations in force, have defined forms and terms for their return.

The repayment of the amounts contributed by customers is basically carried out through the issuance of 10 or 15-year endorsable promissory notes, through repayment in the provision of sanitation services.

The detail of reimbursable financial contributions as of June 30, 2023, and December 31, 2022 is as follows:

16.5 Fair value of financial instruments

Fair value of financial instruments carried at amortized cost.

The fair values of the main financial assets and liabilities, including those not presented at fair value in the consolidated statement of financial position, are summarized as follows:

	06-30-2023	
	Amortized cost ThCh\$	Fair value ThCh\$

Bank debt, level 2	258,536,338	235,431,217
Bonuses, level 1	770,955,301	828,824,441
AFR, level 3	188,886,041	0
Financial liabilities maintained at amortized cost	1,218,377,680	1,064,255,658

Methodology and assumptions used in the calculation of fair value

The fair value of financial assets and liabilities were determined using the following methodology:

- a) The amortized cost of time deposits and mutual funds is a good approximation of fair value, since they are short-term transactions.
- b) The market value of forward derivative transactions in foreign currencies corresponds to the value resulting from applying the exchange rates in effect at the date of valuation to the maturity of the transaction and applying a rate.
- c) The amortized cost of AFR liabilities is a good approximation of fair value, since they are transactions with low liquidity in the market, and the rate applied corresponds to that indicated in the norm that regulates them (DFL No. 70).
- d) The fair value of the bonds was determined based on market price references, since these instruments are traded in the market under standard conditions and with a high degree of liquidity.
- e) The fair value of the bank debt was determined by discounting the cash flows of each loan (principal and interest disbursements) at an interpolated swap curve rate corresponding to the remaining term. This term corresponds to the number of days between the closing date of the month of the financial statements and the date corresponding to the disbursement of each loan.

Hierarchy recognition of fair value measurements in Consolidated Statements of Financial Information

- Level 1 corresponds to fair value measurement methodologies using market shares (without adjustments) in active markets and considering the same valued assets and liabilities.
- Level 2 corresponds to fair value measurement methodologies using quoted market price data, not included in Level 1, that are observable for the assets and liabilities measured, either directly (prices) or indirectly (derived from prices).
- Level 3 corresponds to fair value measurement methodologies using valuation techniques that include data on the assets and liabilities being valued that are not based on observable market data.

16.6 Derivative financial instruments

On December 13, the company issued and placed two bonds in international markets under regulation of the Securities and Exchange Commission of the United States of America, under the securities law of 1933, of the United States of America for an amount of AUD \$20,000,000 (twenty million Australian dollars), maturing in 2037, at an interest rate of 6.82% semiannually and JPY 5,000,000,000 (five billion Japanese yen), maturing in 2037, at an interest rate of 2.16% semiannually. In aggregate, the bonds are equivalent to approximately USD 50,000,000.

The funds raised from the bond issue will be used to finance eligible projects within the company's green and social framework.

The obligations arising from the bonds for the company will not be secured by guarantees of any kind and will not be subject to public offering either in the United States of America or in the Republic of Chile.

The description of the provisions included in this item is as follows:

1.- Other provisions, current.

i. Legal claims

The Company records the provision corresponding to lawsuits arising from its operations, mainly originated by sanction processes carried out by audit entities. Additionally, Aguas Andinas and subsidiaries are parties to civil and labor lawsuits whose resolutions are pending in the corresponding courts.

The provisions associated with the current lawsuits of the Company have been reflected under "Provisions", in accordance with the provisions of IAS 37. In those cases, in which Management considers that the cases have a low probability of success and do not represent a certain probability of material loss, no provision has been made.

The following is a detail of the legal claims that could affect the Company:

The Superintendence of Sanitation Services (*Superintendencia de Servicios Sanitarios*) (SISS) has issued fines against Aguas Andinas S.A. and Subsidiaries mainly due to non-compliance with instructions and infringement of the continuity and quality of the service provided by the Company. The total of the claims filed as of March 2023 amount to UTA 4,722, which were paid prior to initiating the claim processes in each of the cases, and the final rulings are pending resolution.

Additionally, Aguas Andinas S.A. was notified of the initiation of sanction procedures by the Superintendence of Sanitation Services. This corresponds to alleged infractions in the provision of services. There are currently administrative appeals and legal claims pending to be resolved, so it is premature to estimate an outcome. The Company considers that it did not incur in the infractions reported, therefore, it is expected that the claims and appeals will be accepted.

Regional Secretariat of Health MR (*Secretaría Regional Ministerial de Salud RM*), Sanction proceedings are pending against Aguas Andinas, initiated by Resolution for alleged violations in the provision of services. Administrative appeals and legal claims are currently in process. The fine ranges from 1 to 1000 UTM.

Labor Lawsuits: Aguas Andinas was sued directly or subsidiarily in labor lawsuits, mainly related to unjustified dismissals. The total amount of the lawsuits is ThCh\$207,451. The legal proceedings are pending in the respective courts or corresponding administrative instances.

ii. Provision for guarantees.

The Company has recognized provisions for guarantees derived from the purchase agreement between ESSAL S.A. and Iberaguas Ltda, signed between Aguas Andinas S.A. and Algonquin Power & Utilities Corp. (APUC).

2.- Other provisions, non-current

This basically corresponds to the transaction dated July 10, 2007, signed at the Notary Office of Mrs. María Gloria Acharan Toledo, between Aguas Cordillera S.A. and the developers, in which it is assumed that in the event that in the future Aguas Cordillera S.A. disaffects and sells the land transferred to it, it must pay at least U.F. 52,273.29. This amount will be charged against the existing debt receivable from the developers.

B.- Contingent liabilities

a.- As a result of a water main breakage that affected the commune of Providencia in June 2016 and massive interruptions of potable water supplies due to extreme turbidity in February and April 2017, the Superintendency of Sanitation Services resolved our reinstatement and maintained its decision to sanction the company with fines, which was subsequently claimed in court, the trial is currently still in process, these fines are already paid.

b.- Aguas Cordillera was sued in an ordinary lawsuit in the 11th Civil Court of Santiago for the constitution of easements, the amount sued was ThCh\$3,689,946. The case is in the Court of Appeals and on May 20, 2019, an appeal was filed.

The Company and its subsidiaries are parties to other lawsuits of lesser amounts. It is considered that they will not have a material adverse effect on the financial statements of the respective companies.

Note 19. EMPLOYEE BENEFITS

The Company, at the consolidated level, has a staff of 2,077 employees, of which 75 correspond to Managers and senior executives. Workers who are part of collective bargaining agreements and individual labor contracts, with special indemnity clauses, amount to 1,807 and 18 respectively. Meanwhile, 269 workers are governed by the Labor Code.

On March 31, 2022, the Contract for the Development of the Plan for the Adaptation of Wastewater Treatment Plants to Biofactories of Greater Santiago and Management of Generated Resources, signed between the Company and Suez Biofactoría Andina SPA, was terminated in advance, which resulted in the acquisition of inventories, fixed assets and the internalization of the personnel of the latter.

During the month of September 2020, Aguas Andinas S.A. culminated the early collective bargaining with Unions No. 1 and 3 of Aguas Andinas and Professional and Technical Workers, respectively. While Union No. 2 of Aguas Andinas Workers' Union concluded negotiations during February 2021. All these agreements are valid for three years.

The collective bargaining agreements in force for Aguas Cordillera S.A., and personnel of Aguas Manquehue S.A., were signed in December 2021 and October 2021 for Unions No. 1, 2, and Union of Workers and Supervisors respectively, all of which are valid for three years.

Also, Aguas Cordillera S.A. closed a negotiation process with FENATRAGUAS, a union organization that brings together the unions present in the company Aguas Cordillera S.A., through which it agreed on a system of union contributions and exceptional indemnities for educational expenses of its workers and their families.

The current collective bargaining agreements for Análisis Ambientales S.A., Hidrogística S.A. and EcoRiles S.A. were signed in December 2021, October 2021 and May 2020, respectively. The term of these contracts is 35 months for Análisis Ambientales, 36 months for Hidrogística, and 24 months for EcoRiles. The employees of these subsidiaries are governed by the rules established in articles 159, 160 and 161 of the Labor Code, so there is no provision for severance payments for years of service.

Additionally, in April 2021 a Collective Bargaining Agreement was signed with the "Negotiating Group of the Company Ecoriles S.A." and in December 2021 a Collective Bargaining Agreement was signed with the "Negotiating Group of Análisis Ambientales S.A.", both with a duration of two years.

Defined benefits plan policies

Employees who are not part of the collective bargaining agreements of Aguas Andinas S.A. and its subsidiaries are governed by the rules established in Articles 159, 160 and 161 of the Labor Code; therefore, no provision is recorded for severance payments for years of service.

For those employees who recorded severance payments at current value until 2002 (including severance payments recognized at that date), the actuarial calculation is applied, as well as the advances granted on account of this severance payment.

For employees who are part of or were assimilated to the collective bargaining agreements in force at the date of the consolidated financial statements, the actuarial value calculation for severance indemnities is applied.

Accounting policies on the recognition of profits and losses in defined benefit plans

The obligations for severance payments estimated to accrue to employees retiring from Aguas Andinas S.A., Aguas Cordillera S.A. and Aguas Manquehue S.A. are recorded at actuarial value, determined using the projected credit unit method.

Actuarial gains and losses on indemnities arising from changes in the estimates of turnover rates, mortality, salary increases or discount rates are recorded in accordance with the provisions of revised IAS 19, in other comprehensive income, directly affecting equity, which is subsequently reclassified to retained earnings. This procedure began to be applied in 2013, due to the entry into force of revised IAS 19. Until 2012, all variations in the estimates and parameters used determined a direct effect to income for the period.

Actuarial assumptions

Years of services: In Aguas Andinas S.A., Aguas Cordillera S.A., and Aguas Manquehue S.A., it is assumed that employees will remain in these companies until they reach the legal retirement age (women up to 60 years of age and men up to 65 years of age).

Participants in each plan: Workers who are part of union or union-like agreements (indicated above) and workers with individual contracts with severance indemnity clause in all events. Workers who are part of the actuarial indemnity calculation are as follows: Aguas Andinas S.A.: 860; Aguas Cordillera S.A.: 107; and Aguas Manquehue S.A.: 11.

Mortality: The mortality tables RV-2014 of the Financial Market Commission are used.

Employee turnover and disability and early retirement rates: According to the Group's statistical experience, the turnover used in the 2022 period for the target employees are as follows: Aguas Andinas S.A.: 5.87%; Aguas Cordillera S.A.: 7.10% and for Aguas Manquehue S.A. Neither disabilities nor premature retirements have been considered due to the infrequency of these events.

Discount rate: For the 2022 period, a rate of 5.5% was used for Aguas Andinas S.A., Aguas Cordillera S.A., and Aguas Manquehue S.A., which corresponds to the risk-free rate, and the estimate of expected inflation in the long term. Beginning January 1, 2023, a discount rate of 5.6% will be used.

Inflation rate: In order to make the long-term estimates for the 2022 period, the estimated long-term inflation rate reported by the Central Bank of Chile was used, which amounts to 3.5%. Beginning January 1, 2023, an inflation rate of 3.5% will be used.

Rate of salary increase: The rates used for the period 2022 are as follows: Aguas Andinas S.A.: 1.7%; Aguas Cordillera S.A. 0.31%; and Aguas Manquehue S.A.: no rate of increase in remuneration.

General description of defined benefit plans

In addition to the benefits indicated in Note 2.2 letter O, the following benefits are indicated:

In the event of death of the employee, compensation will be paid to his or her direct family members in accordance with the provisions of Article 60 of the Labor Code.

In the event that the employee retires from the Company in accordance with numbers 2, 4 or 5 of Article 159, number 1 letter a) or number 6 of Article 160 of the Labor Code, the amount accumulated for this concept up to July 31, 2002 in Aguas Andinas S.A. and December 31, 2002 in Aguas Cordillera S.A. will be paid as severance pay, adjusted quarterly by the variation of the Consumer Price Index, provided that this variation is positive.

For employees of Aguas Andinas S.A. and its subsidiaries that are not part of their collective bargaining agreements, the provisions of their individual employment contracts apply. For the non-sanitation subsidiaries, i.e., Hidrogistica S.A., EcoRiles S.A., Análisis Ambientales S.A. and Aguas del Maipo S.A., the provisions of the Labor Code apply, unless the individual contracts indicate otherwise.

The provision for severance payments is presented by deducting the advances granted to employees.

The movements in actuarial provisions as of June 30, 2023, and December 31, 2022, are as follows:

Provisions for employee benefits	12-31-2022	31-12-2021

Expected payment flows

The Aguas Andinas S.A. Collective Bargaining Agreement states in its seventeenth clause that employees who voluntarily resign to retire due to old age will have a period of 120 days from the date they reach the legal retirement age to actually retire.

The collective bargaining agreements of Aguas Cordillera S.A. and Aguas Manquehue S.A. indicate that a severance payment will be made to workers who voluntarily resign because they have reached the legal age to retire due to old age.

During the 2019 period, the company, together with the Aguas Andinas workers' unions, and with the aim of recognizing the contributions in the working career of personnel with serious health problems who have a duly accredited disabling disease

that affects their work performance or that does not allow them to return to their functions under normal conditions or who are close to reaching the legal age of retirement. For this purpose, female employees, with an indefinite-term employment contract in force, who reach 57 years of age and male employees, with an indefinite-term employment contract in force, who reach 62 years of age, have the option to apply for a Voluntary Retirement Plan. Those workers who have reached the age required by Article 3 of Decree Law No. 3,500 to obtain an old age pension, i.e., over 60 years of age for women and over 65 years of age for men (age attained), may also opt for a Voluntary Retirement Plan.

In accordance with the defined benefit plans mentioned above, the cash flows for the current period are as follows:

Company	Number of employees	Expected flow of payment ThCh\$	Year
Aguas Andinas S.A.	30	2,600,000	2023
Aguas Cordillera S.A.	12	600,000	2023
Aguas Manquehue	3	150,000	2023
Total	45	3,350,000	

Projected liabilities as of December 31, 2023

For the calculation of the projected liabilities of severance payments at actuarial value, as of December 2022, in accordance with IAS 19, the actuarial assumptions in force as of December 31, 2022, already reported in this note, have been used, only the amount of the legal bonus has been increased according to the increase in the minimum salary established in January of this year.

The summary by Company is as follows:

Company	Number of employees	Costs for services ThCh\$	Interest cost ThCh\$
Aguas Andinas S.A.	1107	1,036,685	952,091
Aguas Cordillera S.A.	106	136,896	129,102

Disclosure of benefits upon termination of the employment contract relationship

Compensation for termination of employment is governed by the provisions of the Labor Code, except in those special clauses of the respective collective bargaining agreements or individual contracts.

Profit sharing and bonuses

Corresponds to the Company's obligation with its employees for participation bonuses payable in February and March of the following year. The accrued participation to be paid to workers, as stipulated in the current contracts, is recalculated during the month of February based on the balance sheet of the immediately preceding fiscal period. As of June 30, 2023, and December 31, 2022, the amounts are ThCh\$1,639,903 and ThCh\$5,120,596, respectively. Additionally, advances of this bonus are made in March, June, September and December of each calendar year.

Its annual amount will depend on the profits generated by each Company of the Group.

Personnel expenses

Significant revenue and expense items by segment

Water and Non-Water Segment

The significant items of ordinary income and expenses are mainly those related to the activity of the segment. On the other hand, there are also relevant amounts related to impairment, personnel and other miscellaneous expenses, among which outsourced services are relevant.

Revenue

The revenue of the Company is mainly derived from regulated services corresponding to: production and distribution of potable water, collection, treatment and disposal of sewage and other regulated services (which include revenue related to supply interruption and restarting charges, monitoring of liquid industrial waste discharge and fixed charges).

Detail of significant revenue items

Water segment

Significant items of revenue are mainly those related to the activity of the water and wastewater business, i.e., revenue from water sales, over consumption, variable charge, fixed charge, sewer service, sewer use and sewage treatment.

Tariffs

The most important factor that determines the Company's results of operations and financial position is the tariffs set for its sales and regulated services. As regulated companies, Aguas Andinas and its sanitation subsidiaries are supervised by the SISS and their tariffs are set in accordance with the Sanitation Services Tariff Law D.F.L. No. 70 of 1988.

Tariff levels are reviewed every five years and, during that period, are subject to readjustments linked to an indexation polynomial, if the accumulated variation since the previous adjustment is equal to or greater than plus or minus 3.0%, according to calculations based on various inflation rates.

Specifically, readjustments are applied based on formulas that include the Consumer Price Index, the Manufacturing Sector Imported Goods Price Index and the Manufacturing Industry Sector Producer Price Index, all measured by the Chilean National Institute of Statistics. In addition, the tariffs are subject to readjustment to reflect additional services or better standards previously authorized by the SISS.

The tariffs in effect for the period 2020-2025 were approved by Decree No. 33 dated May 5, 2020, for Aguas Andinas S.A., of the Ministry of Economy, Development and Tourism and came into effect on March 1, 2020 (published in the Official Gazette on December 2, 2020). The current tariffs of Aguas Cordillera S.A. for the five-year period 2020-2025 were approved by Decree No. 56 dated September 11, 2020, and became effective as of December 31, 2020 (published in the Official Gazette on February 24, 2022) and the current tariffs of Aguas Manquehue S.A. for the five-year period 2020-2025 were approved by Decree No. 69 dated October 27, 2020 (published in the Official Gazette on March 13, 2022) and became effective as of May 19, 2020 for the Santa María and Trapenses systems, April 22, 2019 for Group 3 Chamisero, July 9, 2020 for Group 2 Chicureo and June 22, 2022 for Group 4 Valle Grande III.

The last indexations made by each Group Company were applied on the following dates:

Aguas Andinas S.A.

Group 1 February 2022, May 2022, July 2022, September 2022 and February 2023
Group 2 January 2022, April 2022, June 2022, September 2022 and February 2023

Aguas Cordillera S.A. March 2022, June 2022, September 2022 and March 2023

Aguas Manquehue S.A.

Santa Maria March 2022, June 2022, September 2022 and January 2023
Los Trapenses March 2022, June 2022, August 2022, September 2022 and January 2023
Chamisero January 2022, April 2022, June 2022, August 2022, September 2022 and January 2023
Chicureo February 2022, May 2022, July 2022, September 2022 and January 2023
Valle Grande 3 January 2022, April 2022, June 2022, September 2022 and January 2023

Additionally, the tariffs were increased due to investment works that were approved in the respective tariff decrees. The works mentioned are as follows:

Aguas Andinas S.A.

Lo Mena – Cerro Negro Wells (December 2022)
Trebala-Mapocho Nitrogen Treatment (April 2022)
La Farfana Nitrogen Treatment (March 2022)

Aguas Cordillera S.A.

Safety works (September 2022)

Non-water segment

Significant items of revenues are mainly those related to the segment's activity and are closely related to the main activity of each subsidiary, this involves the sale of materials to third parties, revenues from the operation of the liquid industrial waste treatment plant, revenues from services and analysis of potable water and sewage and the sale of biogas.

Detail of significant expense items

Water segment

Significant expense items are mainly those related to salaries, electricity, Operation of Wastewater Treatment Plant, depreciation of real estate and personal property, financial interest expenses, and income tax expenses.

Non-water segment

Significant expense items are mainly those related to payroll, cost of materials for sale and income tax expenses.

Detail of explanation of measurement of results, assets, liabilities, equity and cash flows of each segment

The measurement applicable to the segments corresponds to the grouping of those subsidiaries directly related to the segment.

The accounting criterion corresponds to the recording of those economic events in which rights and obligations emanate in the same sense that arise between economic relationships with third parties. The particularity is that these records will generate committed balances in an asset and liability account according to the spirit of the transaction in each related company according to the segment in which it participates. These accounts, called accounts receivable or payable with related companies, must be netted at the time of consolidating financial statements according to the consolidation rules explained in IFRS 10.

There are no differences in the nature of the measurement of income, since, according to the standard, there are no accounting policies that show different criteria for the allocation of costs or similar.

Note 32. IMPAIRMENT OF ASSETS

Disclosures on impairment of assets by cash-generating unit

A Cash Generating Unit (CGU) is defined as each Company as a whole, since each one individually is capable of generating future economic profits and represents the smallest group of assets that generate independent cash flows. In accordance with the standard, the Company shall assess at each balance sheet date, whether there is any indication of impairment of any asset. If such an indication exists, the Company estimates the recoverable amount of the asset. Assets with indefinite useful lives and goodwill are tested for impairment at least at the end of the reporting period or whenever there is an indication of impairment.

For intangible assets with indefinite useful lives, water rights, a valuation study is performed at market prices, which are compared with the values assigned as deemed cost at the date of adoption of IFRS.

For the lower values, the value in use is calculated, considering the different companies as CGUs, using the latest available medium-term budget estimates for the companies and the recent medium-term budget estimates, determining the different parameters such as discount rates according to models widely used in the market. The parameters are established through the current information for risk-free rates and those of the relevant market, useful life of each company's own assets and usual income growth rates for the companies, considering population growth and consumption variations over the years.

The recoverable amount is the higher of fair value less cost to sell and value in use, which is the present value of estimated future cash flows. Value in use is the approach used by the Group to calculate the recoverable amount of property, plant and equipment, goodwill and intangible assets.

To estimate the value in use of the CGU, the Group prepares projections of future pre-tax cash flows based on the budget available at the time of the impairment test. These budgets incorporate the best estimates, past experience and future expectations of the Management of the Group.

Revenues and costs are projected with a growth rate equal to inflation, investments are projected by the value of depreciation of property, plant and equipment and intangibles increased by inflation, and the variation in working capital is estimated according to the variation between each year of the operating financing needs.

To obtain the present value, cash flows are discounted at a pre-tax rate of 7.48% nominal annual rate, which includes the cash flows generated from the beginning of the following year until the end of the average remaining useful life of the assets, and the residual value of the perpetuity of the last cash flow is added to the present value.

The pre-tax discount rate is determined considering that the present value of the after-tax cash flows should be equal to the present value of the pre-tax cash flows.

The horizon for the projection of future cash flows corresponds to the average remaining useful life of the assets of the CGU, i.e., 19 years. In addition, the investments are authorized by the Superintendence of Sanitation Services in a development plan, under the figure of an indefinite concession and within a stable regulatory framework.

The approach used by the company to assign value to each key assumption used for projecting cash flows considers:

Inflation of 6.5% for 2023, 4.0% for 2024 and 3.0% from 2025 onwards.

Discount rate: weighted average cost of capital (WACC) after tax obtained from market information.

Pre-tax WACC is obtained by finding the target rate that yields the net present value obtained by discounting cash flows at the after-tax WACC.

Projection period: 19 years plus perpetuity. The projection period is obtained by dividing net assets into depreciation and amortization and depreciation and amortization for the last 12 months.

Perpetuity: cash flow for the last period, discounted at the WACC obtained less inflation and brought to present value at the same WACC.

The Company and Subsidiaries perform annual impairment tests for their intangible assets with indefinite useful lives and goodwill.

As of December 31, 2022, the respective impairment tests were performed, based on estimates and projections available to the Group. These estimates indicated that the benefits attributable to the investments with lower associated values individually exceed their consolidated book value in all cases, as well as the intangible assets with indefinite useful lives were evaluated resulting in a higher value than that recorded in books.

As of June 30, 2023, and December 31, 2022 no impairment of assets has been recorded, nor are there any indications of impairment.

The Company has restrictions and obligations arising from bond issues made in the domestic market, where those related to financial metrics are as follows:

1. Series M, P, Q, S, U, V, W, X, Z and AA bonds:

Maintain at the close of each quarter of the Issuer's Financial Statements, a Debt Level no greater than 1.5 times. Notwithstanding the foregoing, the above limit will be adjusted according to the quotient between the Consumer Price Index of the month in which the Indebtedness Level is calculated and the Consumer Price Index of December 2009. However, the above limit will be adjusted up to a maximum level of 2 times. For these purposes, the level of indebtedness will be defined as the ratio between the Expendable Liabilities and the Total Net Equity. The Issuer's Current Liabilities shall be defined as the sum of Total Current Liabilities and Total Non-Current Liabilities. For purposes of determining the foregoing ratio, the amount of all guarantees, simple or joint and several bonds, joint and several co-debts or other guarantees, personal or real, that the Issuer or its subsidiaries may have granted to secure obligations of third parties, with the exception of: (i) those granted by the Issuer or its Subsidiaries for obligations of other Subsidiaries of the Issuer, (ii) those granted by Subsidiaries of the Issuer for obligations of the Issuer, and (iii) those granted to public institutions to guarantee compliance with sanitation legislation and the execution of works in public spaces. For the foregoing purposes, Total Net Equity will correspond to the amount resulting from the difference between the Total Assets accounts and the sum of the Total Current Liabilities and Total Non-Current Liabilities accounts of the Issuer's consolidated Financial Statements.

Net Debt Level Limit as of June 30, 2023 corresponds to the maximum level of 2 times, being the accumulated inflation of 73.2%.

Level of indebtedness as of June 30, 2023: 1.75

2. AC, AD and AE series bonds:

Maintain at the close of each quarter of the Issuer's Financial Statements, a Debt Level no greater than 1.5 times. Notwithstanding the foregoing, the above limit shall be adjusted according to the quotient between the Consumer Price Index of the month in which the Indebtedness Level is calculated and the Consumer Price Index of December 2009. For these purposes, the level of indebtedness will be defined as the ratio between the Net Expendable Liabilities and the Total Net Equity. The Issuer's Net Liabilities will be defined as the sum of Total Current Liabilities and Total Non-Current Liabilities minus "Cash and Cash Equivalents" in its Financial Statements. For purposes of determining the aforementioned ratio, Net Liabilities include the amount of all guarantees, simple or joint and several bonds, joint and several co-debts or other guarantees, personal or real, that the Issuer or its Subsidiaries may have granted to guarantee obligations of third parties, except for: (i) those granted by the Issuer or its Subsidiaries for obligations of other Subsidiaries of the Issuer, (ii) those granted by Subsidiaries of the Issuer for obligations of the Issuer: (i) those granted by the Issuer or its Subsidiaries for obligations of other Subsidiaries of the Issuer, (ii) those granted by Subsidiaries of the Issuer for obligations of the Issuer, and (iii) those granted to public institutions to guarantee compliance with sanitation legislation, the execution of works in public spaces and the provision of advisory and technical inspection services for rural potable water projects. For the above purposes, Total Net Equity will correspond to the amount resulting from the difference between the Total Assets accounts and the sum of the Total Current Liabilities and Total Non-Current Liabilities accounts of the Issuer's consolidated Financial Statements.

Net Debt Level Limit as of June 30, 2023: 2.60 times, being the accumulated inflation of 73.2%.

Level of indebtedness as of June 30, 2023: 1.56

As of June 30, 2023, the tables for the determination of the Net Debt Levels are as follows:

3. Not to sell, assign or transfer essential assets (concession of public services granted by S.I.S.S. for Greater Santiago), except in the case of contributions or transfers of essential assets to Subsidiary Companies.

The Company is in compliance with all the requirements set forth in the bond agreements as of June 30, 2023, and December 31, 2022.

c) Restrictions for bank loans

i) Aguas Andinas S.A.

The Company has obligations and restrictions for obtaining loans contracted with several domestic banks, within which the financial conditions are set forth as follows:

a) Restrictions related to Banco BCI and Banco de Chile loans:

- 1) A level of indebtedness not exceeding one point five times, measured on the figures of its consolidated balance sheets. Notwithstanding the foregoing, the above limit shall be adjusted according to the quotient between the Consumer Price Index of the month in which the level of indebtedness is calculated and the Consumer Price Index of December 2009. With all the above limits will be adjusted up to a maximum level of two times, for the period ended as of June 30, 2023, the variation of the limit of the level of indebtedness amounts to 2.59 times, being the accumulated inflation of 73.2%. For these purposes, the level of indebtedness will be defined as the ratio between liabilities and total shareholders' equity. Liabilities are defined as the sum of Total Current Liabilities and Total Non-Current Liabilities in its consolidated financial statements. In determining the aforementioned ratio, Net Liabilities include the amount of all guarantees, simple or joint and several bonds, joint and several co-debts or other guarantees, personal or in rem, that the Issuer or its subsidiaries may have granted to secure third party obligations, except for: (i) those granted by the Issuer or its Subsidiaries for obligations of other Subsidiaries of the Issuer, (ii) those granted by Subsidiaries of the Issuer for obligations of the Issuer, and (iii) those granted to public institutions to guarantee compliance with sanitation legislation, the execution of works in public spaces and the provision of advisory and technical inspection services for rural potable water projects. For the above purposes, the total Net Equity will correspond to the amount resulting from the difference between the Total Assets and the sum of the Total Current Liabilities and Total Non-Current Liabilities.

Net level of indebtedness as of June 30, 2023: 1.56

- 2) Prohibition to dispose of or lose ownership of essential assets, except in the case of contributions or transfers of essential assets to Subsidiaries.
- 3) Prohibition to distribute dividends, except for the mandatory minimum if there is a situation of delinquency or delay in the payment of any installment of the loan.

b) Restrictions related to Banco Scotiabank, Banco BICE and ITAÚ loans:

- 1) A level of indebtedness not exceeding one point five times, measured on the figures of its consolidated balance sheets. Notwithstanding the foregoing, the above limit will be adjusted according to the quotient between the Consumer Price Index of the month in which the level of indebtedness is calculated and the Consumer Price Index of December 2009. For the period ended as of June 30, 2023, the variation of the debt level limit amounts to 2.59 times, being the accumulated inflation 73.2%. For these purposes, the level of indebtedness will be defined as the ratio between liabilities and total shareholders' equity. Liabilities are defined as the sum of Total Current Liabilities and Total Non-Current Liabilities, less the Cash and Cash Equivalents account in its consolidated financial statements.

Net level of indebtedness as of June 30, 2023: 1.56

- 2) Prohibition to dispose of or lose ownership of essential assets, except in the case of contributions or transfers of essential assets to Subsidiaries.
- 3) Prohibition to distribute dividends, except for the mandatory minimum if there is a situation of delinquency or delay in the payment of any installment of the loan.
